### Darurat Kemandirian Pangan di Kepulauan

Masyarakat di pulau-pulau kecil paling rentan terdampak krisis pangan karena harus membayar lebih mahal. Namun, kualitas gizi anak dan kesehatan mereka rata-rata rendah.

Audio Berita 18 menit

Oleh AHMAD ARIF, FRANS PATI HERIN, SAIFUL RIJAL YUNUS, YOLA SASTRA  
15 Oktober 2023 18:29 WIB • 10 menit baca

KOMPAS.com JAKARTA - Anak-anak makan bubur ayam dicampur jagung bakar, labu paku, ubi jalar dan ayam kampung di Desa Taloko, Kecamatan Mollo Utara, Kabupaten Timor Tengah Selatan, Nusa Tenggara Timur, Senin (7/8/2023). Dua tahun terakhir Labout, Kuleneas membagikan makanan sehat dari bahan lokal secara gratis kepada anak-anak sebelum dua kali. Bahan pangan lokal diambil dan dipanen dari sekitar desa.

JAKARTA, KOMPAS - Inflasi harga pangan di dunia telah meningkatkan kerawanan global, termasuk Indonesia yang pasokan pangannya bergantung pada impor. Masyarakat di pulau-pulau kecil berada di garis depan yang paling rentan terdampak krisis ini karena harus membayar pangan lebih mahal. Namun, kualitas gizi anak dan kesehatan rata-rata mereka lebih rendah dibandingkan nasional.

Untuk mengetahui situasi pemenuhan pangan di pulau-pulau kecil ini, Kompas melakukan peliputan lapangan di tiga kepulauan, yaitu Nusa Tenggara Timur (NTT), Kepulauan Wakatobi di Sulawesi Tenggara, dan Kepulauan Mentawai di Sumatera Barat, pada Agustus hingga awal Oktober 2023. Peliputan yang didukung Rainforest Journalism Fund-Pulitzer Center ini juga mengungkap implikasi sistem pangan nasional yang cenderung mengabaikan keberagaman sumber pangan lokal.

### Ancaman Deepfake: KBGO dan Gerak Perempuan yang Makin Rentan

Ada bahaya di balik teknologi deepfake yang sedang dirayakan masyarakat teknologi. Perempuan dan minoritas gender jadi target rentannya.

Jasmine Floretta VD  
September 29, 2023 • 17 min read • 8366 Views

"WARNING ada *google form revenge porn*/*ncii* - *deepfake porn* lagi disebarin online." cuit Indah G. melalui akun pribadinya @itsindahg. pada 24 Juni kemarin.

Kalimat itu jadi pembuka utas yang mengungkap sebuah grup Telegram bernama "Rahasia Mantan", yang menyebarkan konten pornografi dan gambar intim non-konsensual (*non-consensual intimate image* atau NCII). Utas yang diunggah di X (Twitter) itu kemudian sempat viral.

Indah bercerita tentang temuannya ini pada saya. Awalnya, Indah dihubungi temannya "P" yang memberi tahu sebuah unggahan teman mereka, "S".

"Hei, sudah lihat unggahannya (S) belum?" kata P kepada Indah.

## 逃离盛世 裸命天涯 那些润透上的中国人

歪腦特別企划  
05 / 01 / 2023

### 序

“润”（以及“润字”）是近年来在中国大陆兴起的，研究如何逃离中国并移民到更自由、更发达国家的网络用语。在严厉的新冠疫情防控政策之下，特别是上海封城之后，“润”在大众文化中变成了一门显学。

然而在润学风靡之前，这股外逃的浪潮，早已在中国近十年来的社会现实中酝酿。正如本特别企划中评论作者仲山所说，“对于未曾亲历中国曾经的政治灾难、习惯了改革开放的设定的新一代来说，中国在过去十年变得越来越陌生，政治极权、经济失速、社会溃败、文化保守，这些方面的变化都以极慢事件的方式出现，不同阶级的人都感受到不同程度的伤害。不仅仅是日渐衰落的中产阶级，普通的工人农民都能察觉到身边出现的困境和危机。”

而曾经沉浸在“大国崛起”自豪感里的年轻人，也不得不面临一个竞争激烈激烈、分配深刻不公的社会。当改革开放的黄金时代和人口红利期都已过去，他们的发展前景暗淡，个人自由又严重受限，被迫面对残酷的现实。

### Inspired by Ukraine war, Taiwan launches drone blitz to counter China

A drone program aimed at countering China's massive drone arsenal. Hitcock footage via Thunder Tiger Group and Taiwan Presidential Office. Photo by Catherine Tai.

After Ukraine deployed drones to successfully offset Russia's advantages on the battlefield, Taiwan's leaders took note. But an internal report presented to President Tsai Ing-wen contained an alarming finding: In drones, Taiwan lagged far behind its much more powerful adversary – China. Now, the island has enlisted commercial drone companies in a bid to catch up.

By MICHAEL JAMES ROBERTS and DANIEL LAGAKI | First published July 20, 2023, 12:48 AM GMT

**TAIPEI**

In the summer of 2022, just months after Russia invaded Ukraine, Taiwan's president gathered senior officials from her ruling party in downtown Taipei. On the agenda: How was Ukraine, in its war with Russia, successfully offsetting the advantages of a much more powerful foe?

How the World Trade Organization lost control of its two most important members — and became irrelevant in the process.

BY GRADY MCGREGOR — AUGUST 13, 2023

ECONOMY POLITICS TRADE

Illustration by Valeria Petrone

On November 30, 2020, in a small classroom in Geneva, Switzerland, one of the world's most powerful courts withered into nothing. That day, Dr. Hong Zhao, the last remaining member of the World Trade Organization's Appellate Body, stepped down. For 25 years, the seven-person committee had provided the final say in trade disputes between the WTO's member countries, acting in many ways as the referee of globalization. As of 2022, 98 percent of the \$25 trillion global trade market to

A drone program aimed at countering China's massive drone arsenal. Hitcock footage via Thunder Tiger Group and Taiwan Presidential Office. Photo by Catherine Tai.

After Ukraine deployed drones to successfully offset Russia's advantages on the battlefield, Taiwan's leaders took note. But an internal report presented to President Tsai Ing-wen contained an alarming finding: In drones, Taiwan lagged far behind its much more powerful adversary – China. Now, the island has enlisted commercial drone companies in a bid to catch up.

By [VINDULIE JAMESBORNET](#) and [DANIELA LAURIE](#) | First published July 20, 2023, 12:48 AM GMT

**TAIPEI**

In the summer of 2022, just months after Russia invaded Ukraine, Taiwan's president gathered senior officials from her ruling party in downtown Taipei. On the agenda: How was Ukraine, in its war with Russia, successfully offsetting the advantages of a much more powerful foe?

COVER STORY

### Sidelined

How the World Trade Organization lost control of its two most important members — and became irrelevant in the process.

BY GRADY MCGREGOR — AUGUST 13, 2023

ECONOMY POLITICS TRADE

Illustration by Valeria Petrone

On November 30, 2020, in a small classroom in Geneva, Switzerland, one of the world's most powerful courts withered into nothing. That day, Dr. Hong Zhao, the last remaining member of the World Trade Organization's Appellate Body, stepped down. For 25 years, the seven-person committee had provided the final say in trade disputes between the WTO's member countries, acting in many ways as the referee of globalization. As of 2022, 98 percent of the \$25 trillion global trade market to

## Exposing the junta's efforts to finance its war on Myanmar's people

Myanmar Now July 6, 2023

Myanmar junta chief Min Aung Hlaing is seen at a Buddhist ceremony in Naypyitaw on June 28 (Popular News Journal / Facebook)

### Myanmar regime opens bogus bank accounts to bypass Western sanctions on MOGE

The Myanmar regime has established a fraudulent entity to replace the banking details of its oil and gas venture in an attempt to access sanctioned funds outside the country originally paid by foreign partners, according to an internal document leaked to Myanmar Now.

The letter, dated April 19, outlines a request by the regime's energy ministry to the Central Bank of Myanmar (CBM) to create separate bank accounts in US dollars, Chinese yuan or renminbi, and Thai baht. It asks that the accounts be registered under the name "Kant Kaw"—a type of Burmese flower—at the state-owned Myanmar Economic Bank (MEB) in the military capital of Naypyitaw.

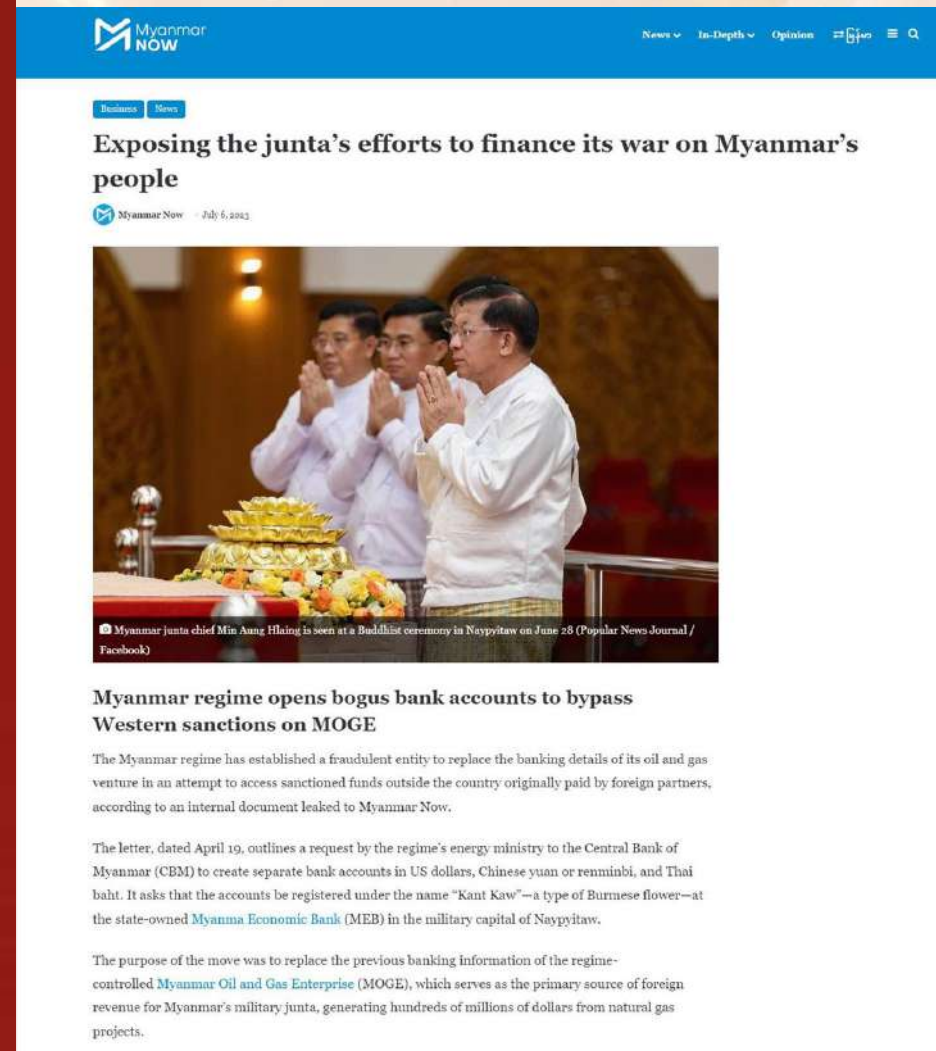

The purpose of the move was to replace the previous banking information of the regime-controlled Myanmar Oil and Gas Enterprise (MOGE), which serves as the primary source of foreign revenue for Myanmar's military junta, generating hundreds of millions of dollars from natural gas projects.

韓國 台灣 菲律賓

東南亞 國際關係

軍事 民主 人權

台灣島事

去年（2022）8月2日美國眾議院議長裴洛西（Nancy Pelosi）訪台後，中國再度宣稱「台灣海峽不存在所謂的對峙中線」，解放軍跨越中線的軍事行動成了「新常态」，台海局勢急速升溫。然而中國軍演不只圍台，也威脅日本、菲律賓等國家，並加速推動國際社會合作的新戰略，包括日本自衛隊進行了新的軍事部署；美國則與菲律賓合作新設4個基地，大幅影響美、日、韓等國在西太平洋的軍事布局。

對台灣人而言，認識這個海域的變化極度重要。《報導者》採訪團隊深入日本沖繩群島的軍事重地，帶讀者了解距離台灣很近的沖繩諸島正經歷的巨大變動。

我們也透過台灣國防部與日本防衛省的公開資料，視覺化分析一年來共機、共艦的驅擾軌跡，看見「台海新局勢」如何牽動太平洋各國。

## Kontinentalist

**Terraforming Singapore: Is the future made of sand?**

Building the Singapore story

Singapore is the little island that could.

On the world map, it is as small as a grain of sand. When Indonesia's ex-president B.J. Habibie called it "the little red dot" in 1998, it was reportedly meant as an insult. Today, that descriptor is a point of pride for an island-nation punching well above its weight.

## The Age

**Who is eating all the fish?**

The number of overfished stocks has tripled over the past 50 years, as fishing fleets push further afield to feed their growing populations.

By Erik Bagshaw and the Visual Stories Team | NOVEMBER 6, 2023

More than 90 per cent of the world's major marine fish stocks are classified by the United Nations as fully exploited, over-exploited, or significantly depleted.

The number of over-fished stocks has tripled over the past 50 years pushing fishing captains and their fleets further out to sea in search of profits from the \$600 billion a-year industry.

Marine conservationists say commercial overfishing is hitting entire underwater ecosystems, creating an imbalance that is harming everything from coral to sea turtles, while reducing the ability of small coastal fishing communities to survive.

**Exclusive Economic Zones (EEZ)**

To protect marine life and coastal communities, the ocean is divided into international waters and hundreds of exclusive economic zones. The economic zones give each country control over the area stretching 200 nautical miles from its coastline and jurisdiction over living and non-living resources under the sea.

Many fleets choose to fish legally in international waters just on the edge of other countries' economic zones and some ships pay to fish in other nations' territory. Others do not - opting to turn off their automatic identification systems to conduct illegal, unreported, and unregulated fishing.

The economic zones give each country control over the area stretching 200 nautical miles from its coastline and jurisdiction over living and non-living resources under the sea.

Many fleets choose to fish legally in international waters just on the edge of other countries' economic zones and some ships pay to fish in other nations' territory. Others do not - opting to turn off their automatic identification systems to conduct illegal, unreported, and unregulated fishing.

「海葵」致香港破紀錄暴雨多區水浸，深圳嚴重內澇，水庫排洪 | Whatsnew

連環水浸，颶風海葵的動盪已造成廣東省東部與福建多地暴瀉。

2023年9月8日，連環水浸，颶風海葵的動盪已造成廣東省東部與福建多地暴瀉。攝影：Ryan Liu/端傳媒

9月7日晚開始，香港各地普降暴雨。香港天文台在8日凌晨1時15分發布的至高風暴預警信號在7日11時至午夜12時維持一小時而達158.1毫米，為1884年有紀錄以來最高。而根據天文台的雨量數據，大埔、北區則屬瀾灤口一帶過去24小時累積雨量已經超過400毫米。其中大部分應該都是7日晚開始積聚的降雨。

毗鄰香港的中國大陸廣東省深圳市也遭大暴雨。根據當地自動氣象站監測數據，羅湖區多處六小時內降雨量超過300毫米。其中東門街自動站維持340毫米以上，累積24小時雨量超過450毫米。根據社交網絡上的消息，羅湖區內大區區域內甚至停水停電。

暴雨由上颶風襲台灣的颱風「海葵」餘波影響。「海葵」離開台灣後在福建登陸，其強勁的風力及暴雨，對廣東省東部及福建多地造成嚴重水浸。

合肥故居獻花現場：他們為心目中的好人 李克強，開一場民間追悼會

大城市的封鎖的中國，年輕人與中年人的中國就這樣相遇在寧小的巷子中，標誌的標誌也許不重要，重要的是他是一個好人。

2023年10月31日，安徽省合肥市，前中國總理李克強的故居前，人們聚集獻花。攝影：Andreas Venzke/istockphoto via Getty Images

10月27日中國國務院總理李克強的死訊公佈後，其出生和成長地安徽合肥，相繼地安徽滁州定遠，以及曾經主政的河南鄭州，都罕見地出現了大規模線下民眾自發悼念，其中又以合肥李克強故居前的悼念規模最大，在網上的傳播範圍最廣。

「李總理是我們安徽人的驕傲」，死訊傳出的當天，家鄉群裏有權威感嘆，配上了兩個哭臉的表情。作為李克強的「老鄉」，合肥人會如何看待他呢？又會如何紀念他的十年總理任期和離世呢？

這幾天，我分別在一個凌晨和一個白天去了李克強故居的祭奠現場。以下文字是...

十多年來，我在古巴首都哈瓦那，親身體驗史上最時最久的經濟封鎖。

滿街都是美國舊車。在新車、零件被美國長期禁運的限制下，古巴人用種種克難方法，讓這些早該進廢車場的雷佛蘭、奧斯摩比，維持運作長達60年之久，成世界奇觀。

這個景象，正是現在被美國技術制裁的中國半導體業，一個可以對比的未來。

2019年一個炎熱的夏日傍晚，我前往饒河夜市，耐心地排著長隊，希望能買到米其林指南上寫的「手工現製、多汁爆漿的黑胡椒豬肉餡餅皮包」。

2018年，米其林第一次在台灣舉辦評比，就發現台灣的夜市小吃實在太誘人，於是破例推薦了20家夜市小吃。

很多人跟我一樣，手上拿著米其林指南耐心排隊。但我排了一小時，前頭還有好多人，加上那天有事得早起，只好放棄。我錯過了品嚐美食的機會，但更重要的是，這也是台灣告別低薪的機會。

#### 華為秘密打造地下工廠，突破美國封鎖？最新Mate 60 Pro是一場政治大秀

【陳良橙專欄】美國商務部長盧賓多訪中第三天，華為就大秀旗艦機Mate 60 Pro。這支號稱「突破封鎖」的新機，據傳與台類的技術差距，從十年拉近到五年。然而，為什麼外界將此視為一場政治大秀？

文章原標題 - 0705

十多年前，我在古巴首都哈瓦那，親身體驗史上最持久的經濟封鎖。

滿街都是美國傳單。在新車、零件被美國長期禁運的限制下，古巴人用種種克難方法，讓這些罕談進廢車場的雪佛蘭、奧斯摩比，維持運作長達60年之久，成世界奇觀。

這個景象，正是現在被美國技術制裁的中國半導體業，一個可以對比的未來。

FuturArc

The screenshot displays the FuturArc website interface. At the top, the logo 'FUTURARC' is accompanied by the tagline 'The Voice of Green Architecture in Asia-Pacific'. A navigation menu includes 'Magazine', 'App', 'Projects', 'People', 'Stories', 'Industry', 'Competitions', and 'Products'. Below the navigation, a 'Commentary' section is highlighted. On the left sidebar, there are filters for 'Years' (2024, 2023, 2022, 2021, 2020) and 'Categories' (Main Feature, City Profile, Showcase, Commentary). The main content area features an article titled 'Designing for Non-humans as an Act of Service' by Nipun Prabhakar, dated September 20, 2023. The article's sub-headline is 'HUMANS' RESPONSIBILITY AS STEWARDS'. The text discusses the relationship between humans and animals, emphasizing the need for innovative and functional structures for zoos, wildlife parks, and conservation centers. It highlights an overlooked aspect of animal shelter design: one done as an act of service. The article includes a photograph of a birdhouse with a barber shop on the ground floor and sketches of a man and a Sarus crane. A caption below the sketches reads: 'Sketches of Mohammed Arif Khan and the Sarus crane. Drawings by Nipun Prabhakar'. The article concludes with a story from Uttar Pradesh, India, about a man forging an unlikely but heartwarming connection with a Sarus crane.

**ECONOMYNEXT** – The tendency of Washington to blame China for the post-2018 sovereign default wave in which Sri Lanka is also caught up in, is a repeat of earlier exercises where Arabs and the ‘East Asia savings glut’ was blamed for US driven policy errors.

In the current dollar area default wave, Argentina, which originally led the Keynesian ideological foundation of a sterilizing central bank which tries – and fails – to neutralize the balance of payments with a fixed pegged rate and crashes heading into currency crises, was in pole position as it defaulted in 2019, as Fed tightened policy in 2018 with an IMF program in place.

The defaults or near defaults of countries like Pakistan with an IMF program in place and continued instability in Bangladesh with a program in place, is a result of worsening anchor conflicts and ‘monetary policy modernization’ advocated by the Fund itself, where unworkable inflation targeting is foisted upon reserve collecting central banks.

**Easy Dollars, Bad Money**

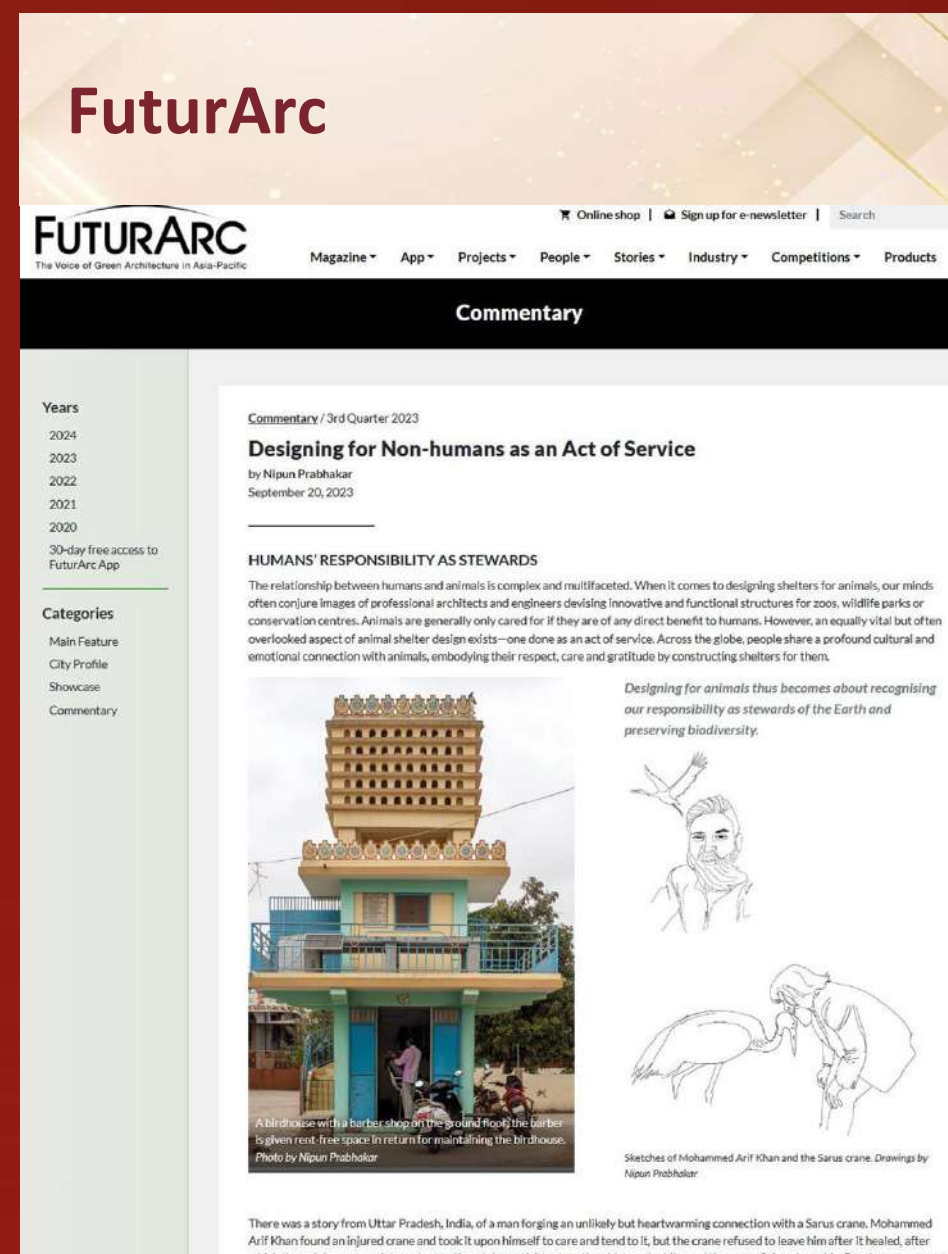

This should serve as a warning to Sri Lanka’s politicians as policy makers who drove the country into heavy commercial borrowing in the Fed’s easy money period with stimulus to close a supposed output gap undermining domestic stability, presents a deeply flawed monetary law to legalize the policies from 2012 to 2022, which eventually ended in sovereign default.

Under the Bretton Woods period, during what was a tight monetary standard despite its flaws, there were no big commodity bubbles and banking crises, compared to what were seen during the post-1971 fiat floating exchange rates. Sovereign defaults were almost non-existent.

Even the notorious Latin American soft-pegged defaults with having to keep a link to gold, however flawed and imperfect the Bretton Woods was, it was a much tighter monetary standard than positive inflation targeting.

It was also a much tighter standard than the deadly depreciation on top of positive-inflation-targeting floating rates that were initially advocated as BRC policy (basket-hand-crawf) and are now called flexible exchange rates.

**Designing for Non-humans as an Act of Service**  
by Nipun Prabhakar  
September 20, 2023

**HUMANS' RESPONSIBILITY AS STEWARDS**

The relationship between humans and animals is complex and multifaceted. When it comes to designing shelters for animals, our minds often conjure images of professional architects and engineers devising innovative and functional structures for zoos, wildlife parks or conservation centres. Animals are generally only cared for if they are of any direct benefit to humans. However, an equally vital but often overlooked aspect of animal shelter design exists—one done as an act of service. Across the globe, people share a profound cultural and emotional connection with animals, embodying their respect, care and gratitude by constructing shelters for them.

*Designing for animals thus becomes about recognising our responsibility as stewards of the Earth and preserving biodiversity.*

A birdhouse with a barber shop on the ground floor. The barber is given rent-free space in return for maintaining the birdhouse.

Sketches of Mohammed Arif Khan and the Sarus crane. Drawings by Nipun Prabhakar

There was a story from Uttar Pradesh, India, of a man forging an unlikely but heartwarming connection with a Sarus crane. Mohammed Arif Khan found an injured crane and took it upon himself to care and tend to it, but the crane refused to leave him after it healed, after which the man began to farm and prosper. The crane's presence brought prosperity to the man and his family. It is a story of mutual respect and care.

### Mao to Now

*Communist China, once all but impenetrable, opened up only to tighten politically again. Has Xi circled back to the Mao era? And what can we learn from six decades of China writings?*

PERRY LINK - OCTOBER 6, 2023

HISTORY POLITICS

We tend to forget that during the 1960s the U.S. officially sent more people to the moon than it did to China. In that era, the "People's Republic" under Mao Zedong seemed not only other-worldly but quasi-metaphysical, something constructed in the mind based only on whiskers of evidence. China seemed like Shangri-la. My own first in-person glimpse came in fall 1966, when friends in Hong Kong brought me to peer over the colony's northern border at Shenzhen (then a farming village, now the fourth largest city in China). I counted myself lucky to spot a water buffalo.

Among Westerners, only a few privileged travelers were allowed to enter. Han Suyin, a Chinese-Belgian writer of fiction and memoirs, and Felix Greene, a British journalist (and cousin of the novelist Graham Greene) were among them. To those of us on the outside, thirsting from afar, the words of such writers glowed — not only because of their scarcity but because they were uplifting. They attested that Shangri-la was real. In retrospect, one can blame the authors for not mentioning the rain of executions during land reform in the early 1950s or the immense, mind-boggling famine of 1959-62 — but that would be unfair. Traveling with government guides, they were sealed off from such facts. They took rosy façades at face value — in the same way that I, on the outside, took their rosy words at face

Robin Harding FEBRUARY 2, 2023

Batteries, batteries, batteries. The race to attract this industry of the future, and power the electric vehicles that will rule the roads, is as frantic as the rush for AAA cells after an eight-year-old opens their birthday presents.

An orgy of subsidies under the Inflation Reduction Act is building so-called "gigafactories" across the US, while the UK is agonising over the collapse of its only big battery project. One sign of battery-induced insecurity is the number of start-ups wrapping themselves in the flag, with names such as the failed Britishvolt or American Battery Factory.

The logic of batterymania is straightforward. In the future, all cars will be electric. Electric vehicles must have a battery. Ergo, a flourishing auto industry needs battery plants. This is true as far as it goes and batteries will certainly be a large business. But what the mania ignores is many years of experience that shows batteries are a bad business: low margin, capital intensive, dirty and hemmed in by hard physical limits on technological progress. Investors and countries piling into this industry are going to get burnt.

The industry leaders, which do not boast of gigafactories, are all based in Asia. Sony pioneered the lithium-ion battery in the 1990s, but sold out in 2016 after years of struggling to make them pay. Japan's Panasonic and Samsung SDI and LG Energy Solution of South Korea, the industry's most established names, have been enjoying a sales boom, but even in good years they struggle to reach
